Mobile Developer with hands-on experience in Kotlin, Jetpack Compose, Flutter and modern architectural patterns. Passionate about crafting reliable, performant, and user-focused mobile applications. Committed to continuous learning, teamwork, and delivering features that make a meaningful impact.

EDUCATION

Bachelor's Degree, Faculty of Computers and Information – Computer Science Department 2019–2023
GPA: 3.4 – Zagazig University
Graduation Project: A mobile app for diagnosing plant health using advanced image processing.

EXPERIENCE

Project-Based Freelance [Mobile Developer] KMP - Remote Dec 2025 – present
- Albaz Globe – Project Ako Sayara
[Google Play](#)

- Implemented a fully functional shopping cart (add/remove items, quantity control, checkout flow)

- Project Bismar Oct 2025 – Dec 2025
Seller - [Google Play](#) - [App Store](#)
Customer - [Google Play](#) - [App Store](#)

- Developed end-to-end authentication system with email/password and Google Auth for separate seller and customer applications

The Chance - Online Internship Apr–Dec 2025

- Built Android projects using Kotlin and Jetpack Compose following MVVM/MVI architectural patterns.
- Participated in code reviews and daily team standups to improve collaboration.
- Practiced Agile Methodologies applying scrum framework to insure high quality features with continuous feedback.
- Worked closely with backend, QA, and UI/UX teams to resolve issues, refine user flows, and ensure smooth integration.
- Delivered multiple feature modules under real deadlines, mirroring professional engineering cycles.

PROJECTS

Storza e-commerce – personal-project jan 2026 - Present

- Developed a Flutter app with Cubit state management and get_it dependency injection.
- Integrated Supabase backend with Google Sign-In, OTP authentication.
- Built cart and checkout flow with On-Map address selection, Stripe payments, and order status tracking.
- Implemented Rag Chat Bot to suggest products
- Integrated Firebase Analytics, Remote Config And Push Notifications.
- Implemented a CI/CD using GitHub Actions to automate building distribution through Firebase App Distribution.
- Implemented dynamic light/dark theme switching with persistent user preference.
- Integrated freeRASP SDK to enforce tamper detection and root/jailbreak detection, strengthening runtime application self-protection

MoneyPlus Finance Manager App (Team Project) [GitHub](#) jan 2026 - Present

- Implemented Google Sign-In and forgot password authentication flow using Supabase.
- Developed Supabase backend functions and database integration to support core app features.
- Contributed to the statistics and analytics feature displaying spending patterns and financial summaries.
- Set up CI/CD pipeline to automate build and deployment workflows.

Ako Sayara (Automotive-cars and spare parts) – (KMP)

Dec 2025 - present

[Google Play](#)

- Implemented the cart module allowing users to adjust product quantities, pick addresses via Google Maps, and track order status.
- Collaborated with backend, QA, and UI/UX teams to ensure accurate and timely delivery of requirements.

Bismar (Constructions-services (customer-seller)) – (KMP)

Oct-Dec 2025

Seller - [Google Play](#) - [App Store](#)

Customer - [Google Play](#) - [App Store](#)

- Built the complete authentication flow for customer and seller apps, login, signup, and secure session handling.
- Integrated Google Sign-In on Android and iOS and implemented backend-connected authentication.
- Implemented camera capture for ID verification across Android and iOS.
- Worked with backend, QA, and UI/UX teams to resolve API, authentication, and device-related issues.

Mena Project (Chat App) – Identity Feature (KMP) The-Chance

Sep-dec 2025

[GitHub: TheChance101/MENA-mobile](#)

- Participated in Building Identity feature for a cross-platform Modular super-app in an agile, sprint-based environment.
- Implemented full in-app localization that supports English Arabic switching on Android and iOS.
- Configured http client and session handling
- Developed a dynamic Dark/Light theme with shared KMP logic.
- Participated in code reviews to maintain clean architecture and consistent coding standards.
- Worked closely with the backend and UI/UX to debug and refine identity flows.

Aflami – Movies Discovery App (Jetpack Compose) The-Chance

Jul–Sep 2025

[GitHub: Aflami](#)

- Developed a movie discovery app with dynamic search, pagination, and responsive UI.
- Implemented image Blur effects for sensitive content using Coil and Firebase ML Kit.
- Set up CI/CD using GitHub Actions and Firebase App Distribution.
- Collaborated in code reviews ensuring clean Compose patterns and reliable API handling.

ShopSurf – eCommerce App (Kotlin/XML)

Apr 2025

[GitHub: ShopSurf](#)

- Developed a full shopping app with product browsing, cart management, and seamless ordering.
- Designed an XML-based UI using RecyclerView and ViewPager2 for smooth navigation.
- Optimized data handling with Retrofit, Gson, Glide, and Room.
- Applied MVVM and Hilt for clean, maintainable, and scalable architecture.

TECHNICAL SKILLS

Kotlin, Dart, Flutter, Jetpack Compose, KMP, Java, XML, MVVM, MVI, Clean Architecture, Coroutines, Flow, REST APIs, Retrofit, Ktor, JSON, Room, DataStore, SharedPreferences, SQL basics, Firebase, Supabase, Authentication, Unit Testing, Git, GitHub, CI/CD, GitHub Actions, Gradle, Android Studio, jira, clickup, slack,

SOFT SKILLS

Communication, Teamwork, Adaptability, Problem Solving, Time Management, Agile, Scrum, Attention to Detail
