Mobile Developer with hands-on experience in Kotlin, Jetpack Compose, Flutter, and modern architectural patterns. Passionate about crafting reliable, performant, and user-focused mobile applications. Committed to continuous learning, teamwork, and delivering features that make a meaningful impact.

EDUCATION

Bachelor's Degree, Faculty of Computers and Information – Computer Science Department 2019–2023
GPA: 3.4 – Zagazig University
Graduation Project: A mobile app for diagnosing plant health using advanced image processing.

EXPERIENCE

Project-Based Freelance [Mobile Developer] – KMP | Remote Dec 2025 – Present
- Albaz Globe – Project Ako Sayara

- Implemented a fully functional shopping cart including add/remove items, quantity control, and checkout flow.

- Project Bismar Oct 2025 – Dec 2025
Seller - [Google Play - App Store](#)
Customer - [Google Play - App Store](#)

- Developed an end-to-end authentication system with email/password and Google Sign-In for separate seller and customer apps.

The Chance – Online Internship Apr–Dec 2025

- Built Android projects using Kotlin and Jetpack Compose following MVVM/MVI architectural patterns.
- Participated in code reviews and daily standups to strengthen team collaboration.
- Practiced Agile methodologies, applying the Scrum framework to ensure high-quality features with continuous feedback.
- Worked closely with backend, QA, and UI/UX teams to resolve issues, refine user flows, and ensure smooth integration.
- Delivered multiple feature modules under real deadlines, mirroring professional engineering cycles.

PROJECTS

Storza – E-Commerce App (Flutter) [GitHub](#) Jan 2026 – Present

- Built a full-featured e-commerce app using Flutter, Cubit state management, and get_it for dependency injection.
- Integrated Supabase backend with Google Sign-In and OTP authentication.
- Developed cart and checkout flow with on-map address selection, Stripe payments, and real-time order tracking.
- Implemented an RAG-powered chatbot for intelligent product recommendations.
- Integrated Firebase Analytics, Remote Config, and Push Notifications for data-driven user engagement.
- Established a CI/CD pipeline with GitHub Actions to automate builds and distribution via Firebase App Distribution.
- Added dynamic Light/Dark theme switching with persistent user preference.
- Enforced runtime security using freeRASP SDK for tamper, root, and jailbreak detection.

MoneyPlus – Finance Manager App (Flutter, Team Project) [GitHub](#) Jan 2026 – Present

- Implemented Google Sign-In and password recovery flows using Supabase authentication.
- Developed Supabase backend functions and database schema to support core financial features.
- Contributed to the statistics and analytics module, visualizing spending patterns and financial summaries.
- Configured a CI/CD pipeline to automate build and deployment workflows.

Ako Sayara — Automotive Parts & Cars App (KMP)

Dec 2025 – Present

- Implemented the cart module allowing users to adjust product quantities, select addresses via Google Maps, and track order status.
- Collaborated with backend, QA, and UI/UX teams to ensure accurate and timely delivery of requirements.

Bismar — Construction Services App, Customer & Seller (KMP)

Oct–Dec 2025

Seller - [Google Play](#) - [App Store](#)

Customer - [Google Play](#) - [App Store](#)

- Built the complete authentication flow for customer and seller apps, covering login, signup, and secure session .
- Integrated Google Sign-In on Android and iOS with full backend connectivity.
- Implemented camera-based ID Register across both platforms using CameraX Api.
- Collaborated with backend, QA, and UI/UX teams to resolve API, authentication, and device-specific issues.

Mena Project — Chat App, Identity Feature (KMP) | The Chance

Sep–Dec 2025

[GitHub: TheChance101/MENA-mobile](#)

- Contributed to the Identity feature of a cross-platform modular super-app in an agile, sprint-based environment.
- Implemented full in-app localization supporting English/Arabic switching on Android and iOS.
- Configured HTTP client and session management using shared KMP logic.
- Developed a dynamic Dark/Light theme leveraging the same shared KMP layer.
- Participated in code reviews to uphold clean architecture and consistent coding standards.
- Collaborated with backend and UI/UX teams to debug and refine identity flows.

Aflami — Movies Discovery App (Jetpack Compose) | The Chance

Jul–Sep 2025

[GitHub: Aflami](#)

- Built a movie discovery app featuring dynamic search, pagination, and a responsive UI.
- Applied image blur effects for sensitive content using Coil and Firebase ML Kit.
- Established a CI/CD pipeline via GitHub Actions and Firebase App Distribution.
- Contributed to code reviews ensuring clean Compose patterns and reliable API integration.

ShopSurf — E-Commerce App (Kotlin/XML)

Apr 2025

[GitHub: ShopSurf](#)

- Built a full-featured shopping app with product browsing, cart management, and order flow.
- Designed an XML-based UI leveraging RecyclerView and ViewPager2 for smooth navigation.
- Optimized data handling with Retrofit, Gson, Glide, and Room.
- Applied MVVM and Hilt for a clean, maintainable, and scalable architecture.

TECHNICAL SKILLS

Kotlin, Dart, Flutter, Jetpack Compose, KMP, Java, XML, MVVM, MVI, Clean Architecture, Coroutines, Flow, REST APIs, Retrofit, Ktor, Room, DataStore, SharedPreferences, Firebase, Supabase, Unit Testing, Git, GitHub Actions, CI/CD, Gradle, Android Studio, Jira, ClickUp, Slack

SOFT SKILLS

Communication, Teamwork, Adaptability, Problem Solving, Time Management, Agile/Scrum, Attention to Detail
